much of what we know about how to be successful in our roles as superintendent is

generally learned the hard way having a resource to turn to in an effort to mitigate the trial and error nature of our approaches in dealing with the challenges of today's superintendency provides a compelling reason to pick up the book. Howard Smith, superintendent of schools, public schools of the Tarrytowns, Sleepy Hollow, NY, new and current superintendents or prospective school leaders should read this book. I think the authors tied in a lot of leadership theory and practices that would compliment individual styles of school superintendents. Gina Segobiano, superintendent, Signal Hill School District, Belleville, Illinois, learn how to navigate effectively through the new demands facing districts and schools. The goals and challenges for district leaders are constantly changing. Leadership and governance are only parts of the puzzle when other elements such as the NCLB legislation, budgets, standards, and assessment, changing demographics, and public engagement are brought into the picture. Today's superintendent needs an effective tool to help steer the school district to success. Drawing on the experiences of nearly 200 superintendents over the past ten years, the superintendent's fieldbook offers guidance that can be referenced again and again. Written for current and future superintendents, principals, school board members, and teachers, this valuable guide is divided into nine sections, each offering ideas to implement practical lessons, exercises, and questions for reflective practice. The authors identify seven key commonplaces of the successful modern superintendent, including leading within a governance structure, understanding and addressing standards and assessment, considering race, class, and the achievement gap, developing your schools, principals from building managers to leaders of learning, exploring collaborations with agencies of government and organizational allies, engaging your community to construct a shared vision of the future, vignettes describing real events and situations will help you connect lessons learned to your own district experiences and help you and your district thrive in the rapidly changing world of education.

The ICETE programme for academic leadership (IPAL) was officially established in 2010 and arose out of the need to provide training to theological institutions in different regions of the world. IPAL provides a three-year cycle of seminars for the professional development of evangelical academic leaders and administrators to help institutions in their pursuit of quality and excellence in theological education. This publication is the third and final volume intended to accompany and support the IPAL seminars as well as be an independent resource to aid theological institutions with faculty development. Faculty development is at the heart of theological education. This book lays the foundation for institutions to equip, train, and release emerging academic leaders to advance their careers and improve the standards of their teaching and research. The contributors to this volume share the findings of research conducted at evangelical academic institutions in various contexts around the world so other senior administrators can enhance the quality of theological education at their own institution.
